Bluelinestamping.com

1. This Pop Up card base is created with Basic White card stock that is cut to 8 1/2 X 5 1/2 and scored at 2 1/8 and 4 1/4. Fold and burnish to create the fold you see in the photo on the right side.
2. The DSP is from the SAB Sunny Days Designer Series Paper. The inside piece is cut to 4 X 5 1/4 and there are 2 of the same DSP for the small sections that are both 1 7/8 X 5 1/4.
3. The inside pop up White layer is cut to 3 X 4 1/2. The sentiment is from the Something Fancy stamp set.
4. The front focal layers are Basic Black that is cut to 2 7/8 X 3 7/8, and Basic White that is 2 3/4 X 3 3/4.
5. The front images are from the Sending Love Stamp set as well. The mailbox and post are one stamp. It is stamped using Memento Tuxedo Black Ink and colored with Stampin' Blends. The envelope and bird are stamps in the set and are cut using matching Dies included in the Bundle.
6. To create the Pop Up mechanism, cut a piece of Basic White to 3 X 2 1/4 and score it at 1 1/2. Fold and burnish well on the score line. Next fold each side into the center, stopping just short of the score line. Leaving a tiny bit of the score line exposed aides in the card closing.
7. Lay the mechanism with the open ends up on your table. Add Tear & Tape to each of the open ends, BUT close to the fold line - not to cut line.
8. Next open your card to the 4 1/4 score line. Lay the mechanism down on the score line with the two open ends on the bottom against the card. And line up the center score line on the mechanism with the score line of the card. Once you figure the center of the card and see the two lining up, remove the Tear & Tape cover and place the mechanism.
9. Now you should have a square box when the card is opened as shown in the right side photo. Add another strip of Tear & Tape to the top section of the mechanism, where your card layer will go. Place it not quite against the edge of the mechanism and card base.

Center the layer and dry fit it. Then remove the Tear & Tape cover and adhere.

10. Adhere the two focal layers together and dry fit them with the card closed. You should have equal White area around the top, bottom, and right edges of the focal layer. Apply your choice of adhesive to only the left side of the focal layers. It is only adhering to the left front panel.
